SOFTWARE DEVELOPER

- 3+ years of experience as a **Dot Net Developer** and also knowledge of cross-platform application development on the .NET platform.
- Proven knowledge of deploying and testing web applications on IIS.
- Expert in ASP.NET Web API as the platform for building Restful service applications on the .NET Framework and ASP.NET MVC.
- Proficient in **MS SQL Server** and Oracle database design, and development, and in writing Constraints, Indexes, Views, Stored Procedures, Triggers, and User Define Functions.
- Good understanding of functional requirements to convert into technological products using requisite tools.
- Build and deploy azure function app in azure Logic app service.

TECHNICAL SKILLS

Languages : C#, Asp.Net, SQL, HTML, CSS
Frameworks : Angular, .Net Core, Asp.Net, Asp.Net MVC, .Net APIs, WinForms
Databases : SQL Server
IDE's / Tools : Visual Studio (2008-2022), IIS, GitHub
Coursework : Object Oriented Programming, Operating Systems, DBMS

EXPERIENCE

Software Engineer
India

Jan 2022 - Present
Hyderabad

- Development and maintenance of 10+ Angular and ASP.NET MVC -based client web applications, resulting in enhanced user experience and increased customer satisfaction.
- Conducted comprehensive API testing utilizing Postman, identifying and resolving critical issues. Migrated database and Application from On-premise to cloud.
- Identified and resolved performance bottlenecks by rewriting complex SQL queries.
- Spearheaded cross-functional collaboration with development, design, and QA teams, successfully integrating APIs into client applications, boosting efficiency and improving user experience.
- Contributed to the design and implementation of Three-tier architecture for data access and manipulations into client applications
- Adapt in problem-solving with a comprehensive understanding of the software development lifecycle and experience using tools such as GIT.
- Participated in code reviews, contributed to the maintenance of the codebase through thorough documentation.
- Supply tracking application UAT testing and application Support.
- Revamped unit testing procedures, leading to a 25% decrease in critical bug occurrences post-launch.

PROJECTS

WMS Report Web Application

Asp.net, Asp.net MVC, MS SQL

- Architected and executed a robust ASP.NET-based backend WMS Report Web Application, empowering users to access critical reports seamlessly, leading to a 50% improvement in data accessibility and enabling faster response times.
- Streamlined data management by leveraging stored procedures and table value functions in MS SQL database, enabling seamless CRUD operations on a web application.

Wikipedia Search Application ([Link](#))

HTML, CSS, JS, REST API Calls, Bootstrap

- Developed custom Wikipedia search application where users can search and view curated results and can see detailed explanations in Wikipedia by clicking on the specific result
- Fetched search results from a server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML.

EDUCATION

Jawaharlal Nehru University

B.Tech in ECE (CGPA:- 7.4)
